## Sound—Vision—Lighting—Security

From life-style to life-safety, Sound Resource offer consultancy, technical services and on-going support for audio, visual, lighting and security systems in a wide spectrum of environments.

### Welcome to Sound Resource

Sound Resource work with a diverse range of trade and design professionals. We also offer a consultation and support service to system users.

Technology is part of our everyday life; at our place of work, in our homes and in our leisure time. As technology evolves, the systems become more advanced and complex. We help homeowners, businesses and other organisations achieve their technology requirements.

#### Working with you

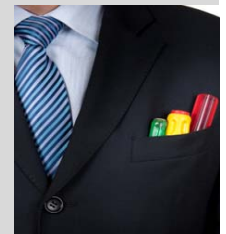

Traditionally we work with architects, property developers and interior designers, through to builders, electrical, Satellite TV

and heating engineers. More recently a number of companies such as IT, telephony and electrical retailers have been looking for a synergy channel to generate business. With increasing system complexity and higher customer expectations it's even harder for the experienced professional to perform all functions in-house.

#### Our Services

Sound Resource offers a cost effective solution. We can help fill the gaps that will allow you to concentrate on the top level requirements of your business.

- > Consultation
- > Design
- > Project Management
- > Commissioning
- > Training
- > Documentation

Contact us for more details or an informal chat about your requirements.
